VIT Bhopal University <i>Bachelor of Technology in Computer Science, 8.60 CGPA</i>	09/2022 – Ongoing <i>Bhopal Madhya Pradesh</i>
--	--

Tsuroni Ltd. — Israel <i>AI Workflow Automation Intern — Remote</i>	Apr 2025 – Jun 2025
---	----------------------------

- Architected and deployed complex AI agent workflows on **n8n** to automate critical business functions, including content creation, financial analysis, and data processing.
- Developed an end-to-end **SEO content pipeline** that performs automated keyword research, scrapes and analyzes top-ranking competitor articles, and generates complete, human-like blog drafts using a chain of LLM agents.
- Automated PDF invoice data extraction from emails to a relational Airtable using a Gemini agent.
- Engineered an automated **stock analysis** workflow that aggregates data from multiple financial APIs, performs technical analysis (RSI, MACD), analyzes news sentiment, and generates a comprehensive report for investment insights.

Student Internship Program— Bhopal Police <i>Member of SIP, Bhopal, Madhya Pradesh</i>	Oct 2024– Oct 2025
--	---------------------------

- Attended multiple **training sessions on cybercrime operations**, gaining exposure to investigation workflows, fraud detection, and response protocols.
- Developed a strong understanding of **cyber fraud mechanisms, preventive measures, and post-incident procedures** within real-world law enforcement contexts.
- Conducted **cyber awareness sessions in schools**, educating students on online safety, fraud prevention, and responsible digital behavior.
- Assisted in **data collection and analysis** for ongoing cybercrime investigations and awareness initiatives under Bhopal Police supervision.
- Supported organization of a **Cyber-Themed Hackathon**, fostering innovation in digital safety and cybersecurity awareness.

Projects

Medical ChatBot	Feb 2025
• Developed an AI-powered medical chatbot using Flask, LangChain, Pinecone, and LLMs for query understanding and response generation. • Implemented Docker-based containerization for consistent development and production environments. • Deployed the application on AWS EC2 with ECR integration ensuring scalable and reliable cloud hosting. • Automated build and deployment using GitHub Actions CI/CD workflows, reducing manual intervention and improving release efficiency.	

Conversational AI Agent	Aug 2025
• Developed a conversational AI agent using LangGraph, Flask, and Python to handle product recommendations and order management queries. • Implemented a state machine architecture with LangGraph to create a robust and scalable conversational workflow • Built a RESTful API with Flask to expose the AI agent's functionality to web applications and utilized JSON for efficient data exchange between the user interface and the AI agent.	

Technical Skills

Languages: Python, Java, JavaScript, HTML/CSS **Tools:** GitHub, AWS, n8n
Libraries: pandas, NumPy, Matplotlib, PyTorch, Tensorflow, Selenium, BeautifulSoup, LangChain, LangGraph
Skills: Agentic AI, Prompt Engineering, NLP, LLM Fine Tuning, DSA, Web Scrapping, OOPs, VB.NET SQL,
Certification: Cloud Computing NPTEL(2024), IBM Cyber Security Analyst(2025), Marketing Analytics NPTEL(2025), JLPT N5(2025)

Achievements

- Solved 300+ questions on Leetcode
- Selected for SIH internal round(2024)
- TCS Codevita Round -1 Qualifier(2025), Round 2 upcoming
- Meta Hacker Cup Round 1 Qualifier(2025), Round 2 upcoming
- Oracle Cloud Infrastructure GenAI Professional Certificate(2025)
